

THE PROXIMITY

PROFESSIONAL TRADING MENTORSHIP

Read What Most Can't.

Market microstructure, institutional behaviour, order flow and volume profile — a structured mentorship that teaches you why price moves, not what to predict.

FOUNDER & MENTOR

Ritvik Vipin

Order flow • Auction theory • Footprint

01 — WHY THE PROXIMITY EXISTS

Most traders learn everything except why price moves.

Retail education is built around patterns and indicators. The Proximity is built around mechanics — the order book, the auction, and the transactions behind every candle. Understanding comes first; execution follows naturally from it.

• ORDER BOOK • AUCTION THEORY • FOOTPRINT • DELTA / CVD • VOLUME PROFILE • LIQUIDITY • ABSORPTION

02 — WHAT MAKES IT DIFFERENT

01

Understand Why Price Moves

The mechanics behind every movement, from the order book upward.

02

Learn How Institutions Think

How professional participants interact with liquidity and execute size.

03

Mechanics Before Strategies

Microstructure foundations before any execution model is introduced.

04

A Repeatable Framework

A structured decision process instead of predictions and opinions.

05

Practical Learning

Every concept reinforced through examples, review and backtesting.

06

Independent Decision Making

Analyse markets without depending on signals or someone else's call.

03 — FOUNDER & MENTOR

Ritvik Vipin

FOUNDER & MENTOR • THE PROXIMITY

Ritvik teaches markets the way professional desks read them — through the order book, the auction and the transactions behind every candle. The Proximity is the program he built to compress that learning curve for serious traders: no signals, no hype, just mechanics, review and a documented process.

INSTAGRAM • @RITVIIIK

Four modules. Sequenced, not scattered.

The program moves from how markets are built, to how price behaves, to the transactional data that confirms it, and finally to a documented framework you run every session.

MODULE 01

Market Foundations

Who participates, why they participate, and how their intentions show up in price.

PARTICIPANTS	MICROSTRUCTURE	THE ORDER BOOK	EXECUTION
• Market Makers & Takers • Institutional Participants • Arbitrageurs & Hedgers • Passive vs Aggressive	• Matching Engine • Price Discovery • Bid & Ask Dynamics • How Candles Are Formed	• Depth of Market • Hidden Liquidity • Spoofing & Sweeping • Liquidity Consumption	• Institutional Execution • VWAP & TWAP Algos • Arbitrage Influence • Hedging Flow

MODULE 02

Price Action & Market Structure

Reading price through auction market theory and institutional participation — not patterns.

AUCTION & STRUCTURE	LIQUIDITY	CONTEXT	LOCATIONS
• Auction Market Theory • Market Structure • Demand & Supply • Failed Auctions	• Liquidity Engineering • Efficient Delivery • Inefficiency Behaviour • Liquidity Mapping	• Balance & Imbalance • Acceptance & Rejection • Institutional Behaviour • Market Context	• Base Over Base (BOB) • Market Opening Range • High-Probability Zones • Strong Bases

DEPTH OF MARKET

LIVE

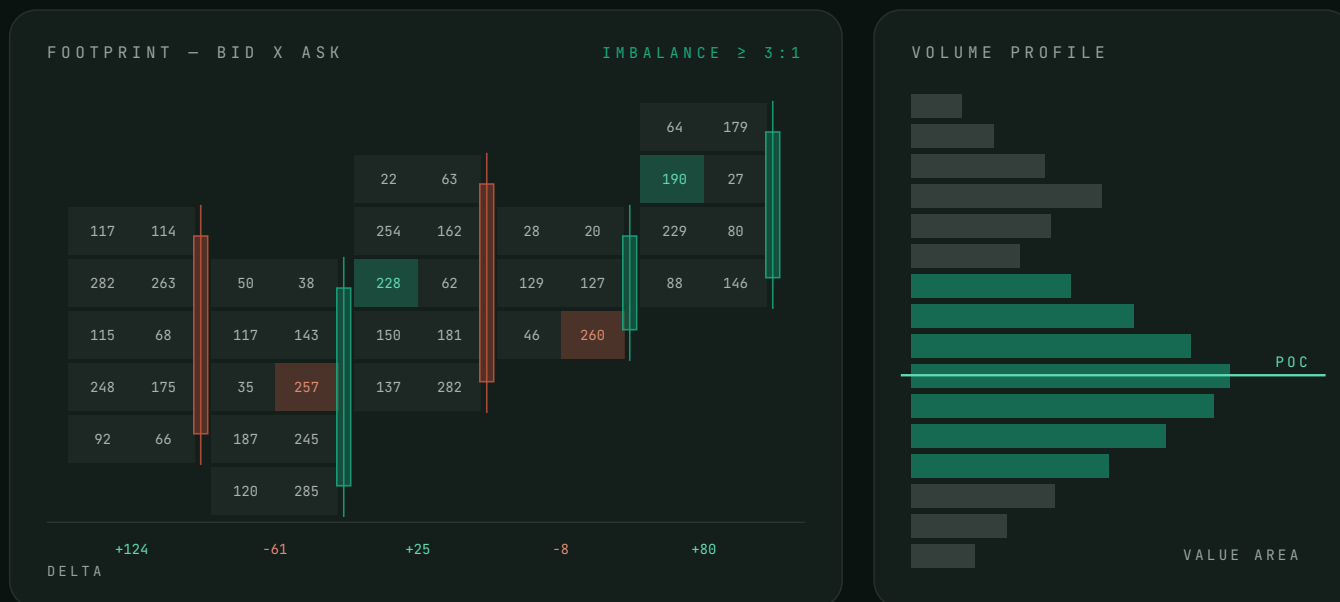

22170		463
22165		341
22160		693
22155		286
22150		612
22145		492
22140		275
22135		592
22130		261

MODULE 01 IN PRACTICE

You learn to read the book itself — resting liquidity, spoofed size, sweeps and where aggressive orders are forced to pay the spread.

03 — ORDER FLOW & FRAMEWORK

A candle tells you where price went. A footprint tells you who moved it.

■ BID IMBALANCE ■ ASK IMBALANCE ■ VALUE AREA

MODULE 03

Order Flow & Volume Profile

ORDER FLOW

- Footprint Charts
- Delta
- Cumulative Volume Delta
- Volume Imbalances
- Absorption
- Order Flow Confirmation

VOLUME PROFILE

- Volume Profile
- High Volume Nodes
- Low Volume Nodes
- Value Area
- Acceptance & Rejection
- Volume-Based Locations

MODULE 04

Professional Trading Framework

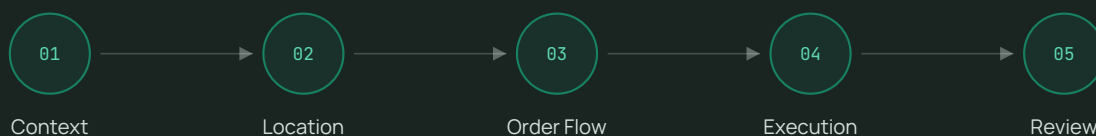

PLANNING & EXECUTION

- Trade Planning
- Market Context
- Entry Frameworks
- Stop Loss Methodology
- Liquidity-Based Targets

RISK, REVIEW & GROWTH

- Position Sizing
- Risk Management
- Trade Management
- Backtesting & Journaling
- Performance Review

THE FRAMEWORK — ONE REPEATABLE LOOP

04 — PROGRAM STRUCTURE

Two months. Learn it, then apply it.

01 MONTH ONE

Live Sessions

- 8 Live Zoom Sessions
- Every Saturday & Sunday
- 4 Consecutive Weekends
- 9:00 PM – 11:30 PM IST
- Session recordings included

02 MONTH TWO

Application & Review

- Structured Backtesting
- Concept Revision
- Performance Review
- Framework Development

BEYOND THE BATCH

Students continue learning through a dedicated WhatsApp community that stays active long after the batch concludes — reviews, discussion and continued study.

05 — OUTCOMES

Capability, not predictions.

- ✓ A deeper understanding of how markets function.
- ✓ Confidence in independently analysing charts.
- ✓ Professional risk management.
- ✓ Continuous improvement through review and backtesting.
- ✓ The ability to interpret institutional price behaviour.
- ✓ A structured trading framework.
- ✓ A repeatable decision-making process.

06 — WHO THIS IS FOR

Built for traders who want to understand, not follow.

01

Beginners

A structured foundation instead of scattered, contradictory information.

02

Intermediate Traders

Those who know the basics but are searching for consistency and process.

03

Working Professionals

Part-time traders who need a repeatable approach around a career.

04

Microstructure-Curious

Traders interested in institutional behaviour, order flow and auction theory.

05

Dedicated Learners

Students willing to study, backtest and practise between sessions.

07 — STUDENT FEEDBACK

“

I came in after two years of losing money to indicators. Within the first month Ritvik had me reading the order book instead of the chart — my losses got dramatically smaller.

Arjun Mehta

SOFTWARE ENGINEER • BENGALURU

“

The footprint module is worth the entire program. Learning to spot absorption at the extremes stopped me from shorting into every low.

Sneha Iyer

INDEX FUTURES • FULL-TIME TRADER

“

Nothing was hyped. No screenshots of profits, no signals. Just auction theory, delta and a repeatable playbook.

Rahul Nair

PART-TIME TRADER • EX-BANKING

“

Sequencing is what makes this different. By the time footprint charts showed up, they were obvious instead of intimidating.

Daniel Fernandes

OPTIONS BUYER • GOA

“

I had already done three courses before this. This was the first one that explained who is on the other side of my fill and why.

Karthik Reddy

OPTIONS & FUTURES • HYDERABAD

“

The live batch reviews are brutally honest. Ritvik showed me 80% of my losses came from one setup I refused to drop.

Priya Sharma

SWING TRADER • 6 MONTHS IN

No signals. No tips. No promises of returns.

AN EDUCATION PROGRAM IN HOW MARKETS ACTUALLY WORK

08 — FREQUENTLY ASKED

01 Do I need prior trading experience?

Yes. A basic understanding of the stock market is required — this program is not designed for absolute beginners. You should already be familiar with how orders, charts and instruments work before joining.

02 Will recordings be available?

Yes. All eight live sessions are recorded and shared with enrolled students for the practice month and afterwards.

03 Which markets are covered?

Index, F&O and equity — with the main focus on index F&O, where order flow reads best. The concepts still carry across markets.

04 What software will I need?

A charting platform you're comfortable with, plus a footprint / volume profile tool for the order flow module. Free and paid options are discussed.

05 How much time outside sessions?

A few focused hours each week for revision, chart study and structured backtesting. Month two is designed around that practice.

ENROLMENT

Join the next batch.

Seats are limited so every student's charts can be reviewed. Register your interest and you'll be contacted with dates, fees and onboarding details.
